X MULTIPLICATION X

A multiplication grid for 6x6. The top row has 6 boxes: orange, pink, purple, green, blue, and red. The bottom row has 6 boxes: white, green, blue, red, white, and white. To the right of the grid are four sets of numbers: 6000 (red), 6000 (blue), 6000 (green), and 6000 (white). Below the grid is a subtraction frame with 36 boxes. The first row has 6 boxes with circled numbers (green, pink, purple, green, blue, red). The second row has 6 boxes with circled numbers (white, green, blue, red, white, white). The third row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fourth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fifth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The bottom row has 6 boxes with circled numbers (white, blue, green, blue, red, white). A horizontal line is drawn above the first row of boxes.

X MULTIPLICATION X

A multiplication grid for 6x6. The top row has 6 boxes: orange, pink, purple, green, blue, and red. The bottom row has 6 boxes: white, green, blue, red, white, and white. To the right of the grid are four sets of numbers: 6000 (red), 6000 (blue), 6000 (green), and 6000 (white). Below the grid is a subtraction frame with 36 boxes. The first row has 6 boxes with circled numbers (green, blue, red, red, blue, red). The second row has 6 boxes with circled numbers (white, blue, green, green, green, white). The third row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fourth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fifth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The bottom row has 6 boxes with circled numbers (white, blue, green, blue, red, white). A horizontal line is drawn above the first row of boxes.

- SOUSTRACTION -

A subtraction frame for 6x6. The top row has 6 boxes: green, blue, purple, green, blue, red. The bottom row has 6 boxes: white, green, blue, white, blue, red. Below the frame is a subtraction frame with 36 boxes. The first row has 6 boxes with circled numbers (green, blue, purple, green, blue, red). The second row has 6 boxes with circled numbers (white, green, blue, white, blue, red). The third row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fourth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fifth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The bottom row has 6 boxes with circled numbers (white, blue, green, blue, red, white). A horizontal line is drawn above the first row of boxes.

+ ADDITION +

An addition frame for 6x6. The top row has 6 boxes: green, green, blue, blue, blue, red. The bottom row has 6 boxes: white, green, blue, white, blue, red. Below the frame is an addition frame with 36 boxes. The first row has 6 boxes with circled numbers (green, green, blue, blue, blue, red). The second row has 6 boxes with circled numbers (white, green, blue, white, blue, red). The third row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fourth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The fifth row has 6 boxes with circled numbers (white, blue, green, green, green, white). The bottom row has 6 boxes with circled numbers (white, blue, green, blue, red, white). A horizontal line is drawn above the first row of boxes.

CM2

÷ DIVISION ÷

A 10x10 grid of 100 empty rectangular boxes. The first 10 boxes in the first row are highlighted in blue. The last 10 boxes in the last row are highlighted in green. A thick black vertical line runs down the center of the grid, separating the left half from the right half.
